PROJECT TITLE: STB Jobs: Connecting Opportunities in Santo Tomas, Batangas

FINAL GROUP PROJECT

System Analysis & Design

A. Project Specification:

I. Brief Description of the System

- STB Jobs is a dedicated job listing platform tailored to connect job seekers within Santo Tomas, Batangas. The website aims to streamline the job-hunting process by providing a centralized hub for local employment opportunities across various industries. It caters to a wide audience, from fresh graduates seeking entry-level positions to experienced professionals looking for career advancement, as well as businesses in need of skilled talent. Through its user-friendly interface and advanced search features, STB Jobs bridges the gap between talent and opportunity, fostering economic growth and empowering the local workforce in Santo Tomas.

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE VICE PRESIDENT FOR CAMPUSES
STO. TOMAS CAMPUS

II. Statement of the Project Problems & Objectives

- The current state of job hunting in Santo Tomas, Batangas, may appear adequate at first glance, but it requires significant improvement and modernization to meet the evolving needs of job seekers and employers. A significant number of job opportunities are shared informally through social media platforms such as Facebook. While these platforms are widely used, they present several challenges. In this project, we aim to answer these following questions:

1. How can the informal and unprofessional nature of job postings on platforms like Facebook be addressed to create a more structured and professional recruitment process?
2. How can a centralized platform improve the accessibility and organization of local job opportunities for both job seekers and employers?
3. What measures can be implemented to ensure the security and legitimacy of job postings and protect users from scams and fraudulent activities?
4. How can a job listing platform contribute to reducing unemployment and supporting the economic growth of Santo Tomas, Batangas?

- These issues hinder the employment process, discourage potential candidates, and create challenges for businesses and companies to find the right people for the job. This project aims to address these challenges through the development of STB Jobs, a dedicated job listing platform tailored for Santo Tomas, Batangas. The specific objectives are as follows:

1. **Develop a Centralized Job Listing Platform** - Establish a website that serves as a centralized hub for all job opportunities in Santo Tomas, consolidating postings across various industries and skill levels.
2. **Promote Professionalism in Recruitment** - Provide a platform specifically designed for job listings, with a professional interface that encourages formal and well-structured job postings.
3. **Streamline the Job Search and Recruitment Process** - Integrate advanced features, such as keyword search, category filters, and quick

Republic of the Philippines

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE VICE PRESIDENT FOR CAMPUSES
STO. TOMAS CAMPUS

result notifications, to make the process efficient and user-friendly for job seekers and employers alike.

4. **Enhance Security and Trust** - Implement verification mechanisms and secure systems to validate job postings and protect users from fraudulent activities, ensuring a trustworthy environment.
5. **Support Economic Growth** - Foster the local economy by connecting skilled workers with businesses, reducing unemployment, and addressing talent gaps in the area.

- By addressing these objectives, the development of STB Jobs will provide a structured, professional, and secure solution to the recruitment challenges in Santo Tomas. It will empower job seekers and employers, streamline the hiring process, and contribute to the economic growth of the City of Santo Tomas, Batangas.

III. **Analysis of the System Requirements**

- **Functional Requirements**

- **Account Creation for Employers** - Employers will be able to create accounts and post job listings with detailed descriptions, including required skills, location, and salary range.
- **Profile Creation for Job Seekers** - Job seekers will be able to create profiles, upload resumes, and specify their skills, experience, and job preferences.
- **Job Matching** - The system will match job seekers with relevant job postings based on their skills and preferences.
- **Search and Filter** - The system will provide search and filter functionality for job seekers to find job listings by keywords, location, job type, or salary range.
- **Application Review by Employers** - Employers will be able to review and shortlist applications from job seekers.
- **Secure Data Management** - The system will ensure secure storage and management of user data, including personal information and resumes.
- **Administrative Oversight** - Administrators will be able to monitor and manage job postings, as well as oversee the application form assessment of job seekers.

Republic of the Philippines

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE VICE PRESIDENT FOR CAMPUSES
STO. TOMAS CAMPUS

- **Non-Functional Requirements**

- **User Management** - The system should be able to effectively manage several users at once.
- **User Interface (UI)** - Both employers and employees should find the interface easy to use and intuitive.
- **Authentication** - Profile and other features are only accessible to authenticated users.
- **Scalability** - An increasing number of users and job listings should be supported by the platform.
- **Data Accuracy** - All preserved information, including notification messages, job postings, and profiles, needs to be correct and current.
- **Code Quality** - For easier updates and repairs, code should be well-documented and modular.
- **Responsive Design** - Responsive design to ensure compatibility across devices.
- **User Support** - Provide a FAQ or assistance area for often asked user questions.
